To whom it may concern,

It is my pleasure to highly recommend without reservation Jose Perez as a Buffalo State College Instructor. As his laboratory supervisor and instructor, I have had an opportunity to witness his creativity, intelligence, diligence, and ability to connect with others. This combination of traits has impressed me tremendously.

I came to know Jose last year in my laboratory where he showed himself to be an excellent leader and is very intelligent and articulate. He completed all of his assignments with little direct instruction from me. Jose completed the assignments and acted as a liaison to the laboratory group, all while providing leadership in the class. As a potential instructor, Jose has managed to provide original contributions to the class and complete his tasks on time with little supervisory direction. Jose has a bright future as a researcher, instructor, and graduate student.

During the time I have known Jose, he has worked to ensure he is among the best in his areas of interest. Due to his knowledge and aptitude for leaning along with his diligence and creativity, he would be an excellent instructor.

Sincerely,

Richard L. Lamb
